Our Mission
The Fulton County Board of Health is committed to promoting and protecting the health of individuals, families, and communities.

Our Vision
All People Are Healthy.

Our Mission
The Fulton County Board of Health is committed to promoting and protecting the health of individuals, families, and communities.

Our Vision
All People Are Healthy.

Locations and Hours of Operation
Clinics are open Monday through Friday, and are closed on weekends and major holidays.

Other Services
The Environmental Justice Initiative strives to ensure that no demographic group is disproportionately affected by adverse environmental conditions created when pollution-generating sources are located in or near residential communities. Fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income is a fundamental part of this initiative.

Vital Records serves as the local agent for printing certified birth and death certificates for births and deaths that occur in any of the 159 counties in Georgia. Additionally, the office assists parents with Paternity Acknowledgment applications and Out of Institution birth registrations. Low THC Oil registrations may also be picked up in Vital Records by appointment only.

Maternal and Child Health Services

Children’s Medical Services (CMS) provides comprehensive, care coordination for children and youth with specialty medical needs, transition services to adult health care, and access to specialized medical visits, medication, medical equipment, personal care items, and other identified medical needs.

Children’s Oral Health provides prevention education and services to infants, children, and adolescents (pre-school to 12th grade). Services include exams, cleanings, x-rays, fillings, sealants, and emergency oral health care.

Parents as Teachers™ is an evidence-based home visitation program that promotes optimal health and development of children birth to age three by supporting and engaging their parents and caregivers. The program targets pregnant women in their first trimester who are at risk for poor birth outcomes and children birth to age three at risk for poor health and developmental outcomes.

The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) provides vouchers for supplemental foods, health care referrals, nutrition education, and breastfeeding support to income-eligible pregnant, breastfeeding, and non-breastfeeding postpartum women, infants, and children up to age five who are at nutritional risk.

Who We Are
The Fulton County Board of Health provides an array of public health population-based, medical and preventive, and special services to women, infants, children, and adolescents living in the county. Services include environmental health, maternal and child health, and sexual health.

Established in 2017, the Fulton County Board of Health operates eight state-of-the-art health centers across the county with the administrative offices located in downtown Atlanta. The Board of Health also has an Office of Vital Records located in the Fulton County Government Center.

Situated in Georgia's largest county, the Fulton County Board of Health offers services to more than 1 million residents and those who work, visit, and play in the county.

Population-Based Services
Environmental Health Services is responsible for reducing the risk of illness and injury related to interactions between people and their environment. Through a combination of surveillance, education, enforcement, and assessment programs, staff identifies conditions that adversely impact human health.

The Division of Health Promotion works to educate, inform, and empower Fulton County residents through evidence-based interventions and strategies that improve health outcomes in the areas of injury, youth development, and chronic disease prevention.

The Office of Epidemiology conducts surveillance for diseases and other health conditions affecting residents of Fulton County. Staff performs a series of activities to identify diseases and describe health conditions, assess the health of the county, and develop recommendations to control diseases and improve the overall County health status.

The Office of Emergency Preparedness (OEP) works collaboratively with local partners to prepare for and respond to emergencies affecting public health. OEP staff develops plans, establishes medication points of dispensing, and working with partners, conducts exercises to address the public health response.

Nursing Services
The Breast and Cervical Cancer Program (BCCP) provides access to breast and cervical cancer screenings, breast health education, and case-management services. BCCP also offers referrals for biopsies, diagnostic mammograms, and additional diagnostic procedures when appropriate at no cost to women who meet eligibility requirements.

Family Planning provides services to aid clients in making informed decisions to prevent pregnancy or when to start or grow their families. The program offers comprehensive physical examinations, screening and or treatment of sexually transmitted infections and contraceptives to adolescents, women, and men.

Nursing Services also include immunizations, health checks, vision, hearing, dental and nutrition screenings, as well as pregnancy testing, travel immunizations, refugee health, and care for high-risk infants.

The Teen Clinic provides comprehensive health care services for adolescents and young adults between the ages of 12 and 21. Staff provides sports and school physicals, reproductive health and sexually transmitted infections (STIs) examinations, referrals, contraceptives, and education to reduce risk-taking behaviors.

Medical and Preventive Services
Respiratory Health (Tuberculosis) program works to eliminate tuberculosis (TB) by conducting physical assessments, screenings, and diagnostic testing for TB infection and active TB disease. Health education and contact tracing is also provided to assist in eradicating the disease.

The Ryan White Program provides primary medical care and essential support services for people living with HIV/AIDS. Clients receive routine medical care, oral health exams and assessments, medical case management, mental health and substance abuse counseling, and information about the AIDS Drug Assistance Program (ADAP).

The Sexual Health (STI, HIV) Clinic works to eliminate the spread of sexually transmitted infections (STIs) and HIV. Clients are tested and treated for STIs and HIV, and if appropriate, are linked to care, treatment, or pre-exposure prophylaxis (PrEP) services.

Maternal and Child Health Services
Babies Can’t Wait (BCW) provides early intervention services for infants and toddlers with developmental delays or disabilities and their families. Services include evaluation, service coordination, and other assistance as identified through screenings and assessments.

Children 1st is the entry point to all public health services. Its purpose is to identify, screen, and link children birth to 5 years of age, who are at risk of poor health and/or developmental outcomes to appropriate public health or community based services.

Early Hearing Detection and Intervention (EHDI) promotes and provides hearing screenings and appropriate follow-up for all newborns and infants through education, technical assistance and training.
