Employee Health

Person in Charge & Health Authority

Report to the health authority if an employee has been DIAGNOSED with an illness due to...

- Salmonella Typhi (Typhoid fever)
- Shigella spp
- Entero-hemorrhagic E. coli (EHEC)
- Shiga toxin-producing E. coli (STEC)
- Hepatitis A virus
- Non-Typhoidal Salmonella

Inform the health authority if an employee is showing symptoms of Jaundice.

Documentation is crucial. Keeping a record book of employee symptoms or illness can help an investigation in the case of a foodborne illness outbreak.
